Greetings

Times are changing and so our education. The student of 21st century is an individual, a person with feelings of self respect, responsibility and compassion. We need to recognize and appreciate this individuality of our students. Education is not about books and examinations, it is an overall development of a student.

We give lot of importance to make discipline a core value, encourage students to develop a sense of responsibility through a well planned academic schedule, various Inter School Competitions, Sports and Cultural Activities. In Tamralipta Public School everyone goes through a beautiful voyage of putting in effort and time. We embolden our students to face the challenges of life and at the same time help the students to move more cautiously ahead with determined strides to become responsible global citizens.

We feel blessed for having a dedicated team of teachers, administrative staff and above all cooperative and concerned parents. I take this opportunity to thank all the parents who have reposed their faith in our school. We assure to do the best for the students and respect your patronages. Finally I would like to say "Education is not preparation for life, education is life itself."
